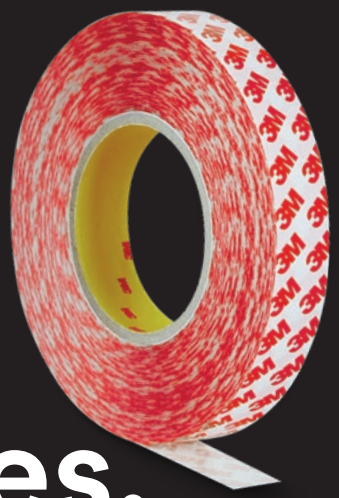
3M Science. Applied to Life.™

Designed for versatility.

3M™ GPT-020F Double Coated Tape is the ideal general purpose industrial thin bond tape for a wide range of applications and substrates.

Expect performance. Spec 3M.

Your go-to tape for greater design possibilities.



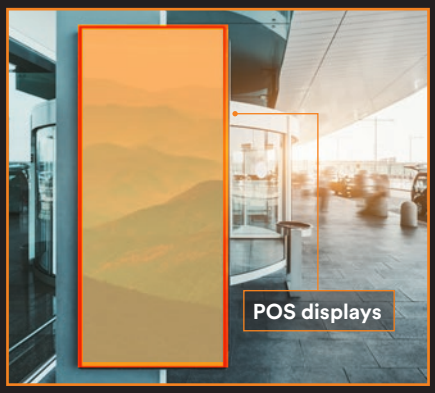
- Solventless adhesive technology
- High initial tack
- High thermal and humidity resistance
- High peel performance on a wide range of surfaces
- Superior high-temperature shear performance
- Adhesion to a wide variety of substrates ranging from metals to some plastics
- Easy handling and converting due to filmic liner delivery
- Perfect for a variety of markets, including consumer appliances, industrial machinery, transportation, consumer electronics

Bonds to many high surface energy substrates and some low surface energy substrates, including:

- Stainless steel
- HDPE
- ABS
- Acrylic
- PP
- Polycarbonate
- Aluminium
- Glass

Creating designs in applications.

Rising to the challenge in many markets including consumer appliances, industrial machinery, transportation, signage, general industrial and consumer electronics.



- POP/POS displays
- Light boxes
- Indoor/outdoor signs
- Paper bonding and packaging
- Metal fabrication
- Splicing and bonding
- Sports equipment
- Home decoration
- Trim attachment in appliance
- Mounting of plastic parts
- Mounting in electronics
- Furniture trim attachment

The next generation of thin bonding.

3M ™ GPT-020F Double Coated Tape

GPT-020F	
Adhesive	Solventless acrylic
Carrier type (thickness)	PET 12 micron
Liner type (thickness)	White PP 100 micron
Total tape thickness without liner	200 micron
Short term temp. performance	190°C
Long term temp. performance	90°C
Colour	Transparent
